

# Mividas Insight

Powerful analytic tools and monitoring  
of your video platform.

# Make the right decisions

Mividas Insight consolidates statistics from meeting platforms, users, call controls, room systems and sensors to give you everything you need to proactively add or reallocate resources in your organization. Track trends and maximize the efficiency of your meeting rooms.

Mividas Core web interface

## Call statistics

Consolidate call statistics from Mividas Core and Rooms to get a complete overview of online and offline meetings. View both physical and virtual meeting room usage as well as individual participants, tenants and groups.

**Full overview** — Consolidate call statistics from Mividas Core and Rooms to get a complete overview of online and offline meetings.

**Generate reports** — Select a date period and generate reports.

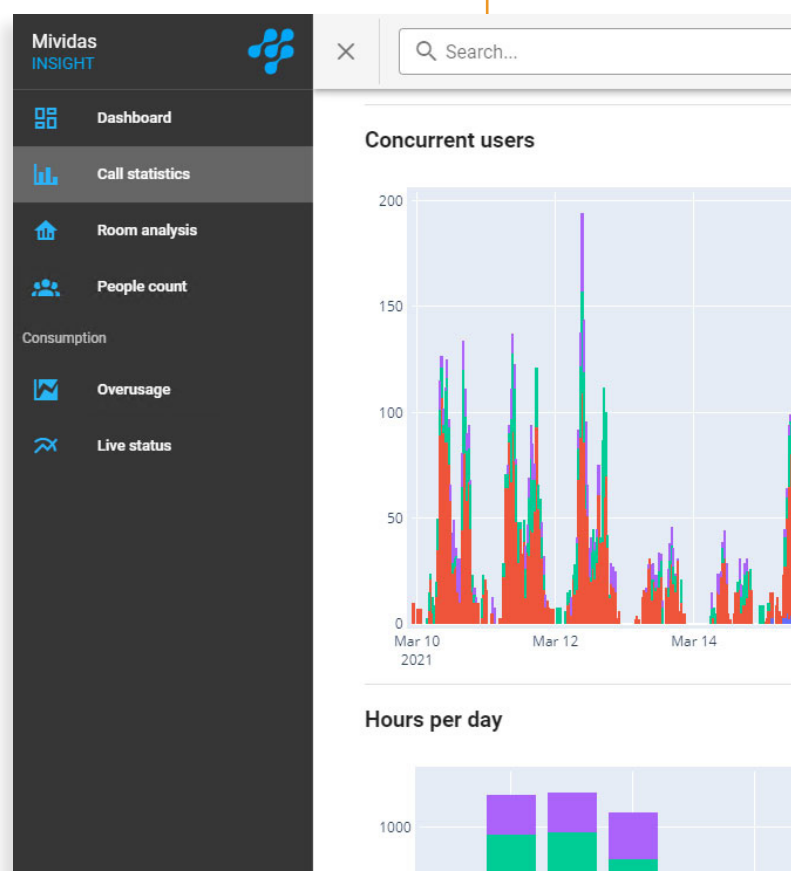

**Virtual meeting rooms** — Detailed statistics about each virtual meeting room.

**Participants** — Gather statistics for length and number of calls for all participants.

**Groups** — Gather statistics for length and number of calls for each group.

Supporting call data from **Cisco Meeting Server®**, **Pexip Infinity®** and **Cisco VCS** in combination with people count from the sensors in your **Cisco Webex Room systems**.

## Room analysis and people count

In-depth analysis of physical room usage with data from Cisco Webex Room systems people count. Configure each meeting room with a maximum number of seats to track attendance.

### Efficiency and availability

— Get an overview of meeting room efficiency, ghost meetings and meeting room availability in real time.

### Facility management

— Room systems with people count sensor technology for planning their organizational needs.

**Generate reports** — Select a date period and generate reports.

**Detailed graphs** — Graphs of participants per date, hour and day of the week.

**Current usage** — Graph showing current usage.

## Overuse and live status

Enterprise and service providers can follow activity of tenants in real time for billing and to anticipate capacity challenges.

### Contract management

— Use our multi-tenant tools to display contract limits for tenants/customers, such as the number of participants.

### Resource usage

— Allow tenants/customers to have larger meetings by downscaling resolution.

**Live usage** — See customer usage changes in real time and quickly identify if any limits are being reached.
