

Mividas Outlook Add-in

Schedule video meetings directly
from end users Outlook client.

Scheduling directly from end users Outlook client

After the Mividas Outlook add-in has been activated, end users will get the option to create a video meeting directly from their Outlook client.

Scheduling video meetings

Schedule video meetings directly from both the desktop and web browser version of Outlook. The add-in also works great with Office 365.

Branding support

Customize our Outlook add-in to fit your organizations profile by uploading your own logo and icon.

Meeting templates

Depending on your organization the Outlook add-in will have different meeting types to choose from such as secure meeting or webinar.

Go secure with Mividas Connect

Our product designed for scheduling different types of secure video meetings directly in your meeting platform. Enabling secure login with SMS or electronic ID verification when scheduling video meetings with the Outlook add-in.
